JeevanAI

Ek AI assistant: Padhai, Career, Documents aur Shopping

Har kaam par user ka control

College Project Presentation

Python | FastAPI | Claude AI | 22 Indian bhashayein

Samasya: aaj ki dikkat

Hum is project ko kyun banaye

1 Alag-alag apps

Padhai, resume, documents aur shopping ke liye har kaam ke liye alag app use karna padta hai.

2 Control kam

AI apne aap kaam kar de to bharosa kam hota hai. User ko pata hi nahi chalta ki kya hua.

3 Bhasha ki dikkat

Zyadatar AI tools English par bane hain. Gaon aur chhote shehron ke log peeche reh jate hain.

4 Ek jagah nahi

Ek hi jagah par, apni bhasha mein, apne control ke saath sab kuch nahi milta.

Hamara samadhan: JeevanAI

Ye project kya hai

JeevanAI ek multi-user AI assistant hai jo padhai, career, documents aur shopping ke kaam karta hai, aur har kaam par user ka control rakhta hai.

Ek jagah, chaar kaam

4 AI agents ek hi app mein

User ka control

ALLOW / ASK / BLOCK permission

Apni bhasha mein

22 Indian bhashayein

Chaar AI agents

Har agent ka alag kaam

Padhai — Study Agent

- Study plan banana
- Notes ka summary
- Quiz banana

Career — Career Agent

- Resume ka check
- Skill gap nikalna
- Career roadmap

Documents — Document Agent

- PDF ka summary
- Dates nikalna
- Document se sawaal-jawab

Shopping — Shopping Agent

- Product ka price track
- Target price par alert
- Kharidta nahi (safe)

Permission control

Hamare project ki sabse khaas baat

ALLOW

Seedha chalao

Kaam turant ho jata hai.

Jaise: study plan banana

ASK

Pehle poochho

User approve kare tabhi kaam hota hai.

Jaise: document padhna

BLOCK

Bilkul mat karo

Kaam hone hi nahi deta.

Jaise: purchase (kharidna)

User kabhi bhi apni permission badal sakta hai. Har kaam ka record Activity tab mein rehta hai, aur ASK wale kaam Approvals tab mein approve ya reject hote hain.

Mukhya features

App mein kya-kya hai

1. 4 AI agents: Study, Career, Document, Shopping
2. Permission aur approval system
3. Multi-user login, har user ka alag data
4. Admin panel: stats aur user management
5. 22 bhashayein, state ke hisaab se
6. PDF upload aur document par sawaal-jawab
7. Price history ka graph aur alerts
8. Dark / light mode aur 5 rang ke theme

Users aur bhasha

Har kisi ke liye, apni bhasha mein

Registration mein ye poochha jata hai

- Poora naam aur email
- Mobile number (India)
- State / UT aur city
- Umar (date of birth)
- I am a: student, job seeker, aur aur
- Apni pasand ki bhasha

Bhasha aur roles

- Sabhi 28 state aur 8 UT ke option
- State chunne par uski bhasha apne aap select hoti hai
- Jaise Tamil Nadu: Tamil, Bihar: Hindi, Kerala: Malayalam
- User aur Admin ke alag profile
- Admin ko stats aur users ki list milti hai

Technology

Kin cheezon se bana hai

Backend

Python, FastAPI

Database

SQLite, SQLAlchemy

Frontend

HTML, CSS, JavaScript

AI

Claude API (Anthropic). Bina key ke offline mode bhi

Security

JWT login, password hashing

Search

BM25 se document mein jawab dhoondhna

Ye kaise kaam karta hai

Ek request ka safar

User
Browser mein app

→

FastAPI
Login check hota hai

→

Permission
ALLOW / ASK / BLOCK

→

AI Agent
Kaam karta hai

→

Claude API
aur Database

- ALLOW hone par kaam turant chalta hai aur jawab user ko milta hai.
- ASK hone par kaam Approvals mein ruk jata hai, approve karne par chalta hai.
- BLOCK hone par kaam hota hi nahi. Har kadam ka record Activity mein jata hai.

Live demo ka order

Kis kram mein dikhana hai

1. Register karo: state chunne par bhasha apne aap badalti hai
2. Study Agent se 5 din ka study plan banao
3. Career Agent mein resume paste karke skill gap dikhao
4. Document upload karo, extract dates chalao, Approvals mein approve karo
5. Shopping Agent mein purchase chalao: Blocked dikhega
6. Permissions tab mein ek action badlo
7. Admin login karke stats aur users ki list dikhao

Suraksha (Security)

Data aur app ko safe rakhne ke tareeke

Password hashing

Password kabhi seedha save nahi hota.

JWT login

Har request par login token check hota hai.

Alag data

Ek user doosre ka data nahi dekh sakta.

SSRF se bachav

Shopping mein sirf public website ke link chalte hain.

Rate limiting

Bahut zyada requests rok di jati hain.

Upload checks

File ka type aur size check hota hai.

Seemayein aur aage ka kaam

Ek imandaar tasveer

Abhi ki seemayein

- Flipkart, Amazon jaisi badi sites ka price kabhi-kabhi nahi milta
- Scanned PDF nahi padh sakta (OCR nahi hai)
- Bhasha ka translation Google ka automatic hai
- Real kharidari (purchase) jaan-boojh ke band hai

Future scope

- Scanned PDF ke liye OCR
- Mobile app
- Password reset aur email verification
- Internet par deploy (HTTPS ke saath)
- Naye agents: health, finance

Sambhav sawaal aur jawab

Poochhe jane par kya bolna hai

Q. Ye ChatGPT se alag kaise hai?

Ye ek hi jagah chaar kaam deta hai, permission system se user ka control rakhta hai, aur Indian bhashaon par dhyan deta hai.

Q. AI kaun sa hai?

Claude (Anthropic). Key na ho to offline rule-based mode chalta hai.

Q. Data safe hai?

Password hash hota hai, JWT login hai, aur har user ka data alag hai.

Q. Purchase kyun band hai?

Safety ke liye. AI ko paisa kharch karne ki ijazat nahi di gayi.

Dhanyavaad

Sawaal?
